# GOOCHS CRATER

## Newnes Plateau

A visit to Goochs Crater, on the Newnes Plateau, should be on everyone's must-do list.

This is an easy walk, that can be managed by young and old alike. The Crater is a natural crater-like swamp feature, not volcanic in origin, ringed by pagoda-like rock formations. It's a wonderful spot for photographers.

This is an easy walk that can easily be managed by active kids. Take care with kids around the Pogada edges. If you have the time, there are lots of spots around the crater you could explore.

**IN THE CRATER:** There is a steep track down into the crater, that's not too tricky. Depending on the water levels in the crater it is possible to walk around the whole floor. Depending on the recent rainfall, you may not be able to get access to the caves on the right of the crater floor. After heavy rain, it can become a lake.

**ACCESS:** Click the "More information" link below for detail access guides, including turn by turn directions, photos & 360° images.

**NB:** You will need a 4wd or all-wheel drive vehicle to access the walk.
